

TALHA HABIB

Backend Software Engineer

Pakistan • +92 3187341088 • talhahabib956@gmail.com

SUMMARY

I'm a dedicated Backend Software Engineer with a year of experience building scalable and optimized systems using Laravel and PHP. I specialize in creating and integrating RESTful APIs, maintaining CRM platforms, and ensuring smooth frontend-backend collaboration with React.js. I'm skilled in MySQL, Docker, and handling server-side operations. I enjoy solving complex challenges, delivering efficient solutions, and working closely with cross-functional teams. My focus is on writing clean, maintainable code while continuously improving system performance and reliability.

WORK EXPERIENCE

Software Engineer (Core PHP)

Aug 2024

Helfertech (current)

- Maintain and enhance existing CRM projects, ensuring smooth functionality and system reliability.
- Collaborate with teams to develop new features and custom modules for CRM systems based on business requirements.
- Handle server-side operations, including deployments and ensuring optimal performance through technologies like Docker and FTP tools.
- Work on CRM integration, backend optimization, and troubleshooting to improve overall system performance and user experience.

Junior Laravel Developer

Dec 2023 - Jul 2024

Viion Technology

- Worked as part of the backend development team, responsible for maintaining existing projects and creating new ones.
- Handled server-side operations, including deployments using popular FTP tools to ensure smooth and efficient releases.
- Delivered scalable, optimized backend solutions with Laravel, and MySQL, and integrated backend services with React.js.
- Collaborated with cross-functional teams to maintain system performance and ensure seamless frontend-backend integration.
